

Speech: Matt Hancock's speech to Parliament at the Urgency of Representation in the Media reception

I'd like to thank Act for Change, the Campaign for Broadcasting Equality & the TV collective for inviting me to speak here today. Each of you plays an important role in driving change, and I thank you for your work. It feels daunting to be the opening act for Sir Lenny Henry. So I'm not even going to try a joke.

But that's appropriate too because the need to see greater diversity on and off our screens is dead serious. Last August I was delighted to launch Project Diamond. It's a hugely ambitious attempt to collect very detailed data about who is employed in front of and behind the camera.

I look forward to seeing its first report later this year. Then we will see the real truth of how representative broadcasting is of the country.

I'm glad there's been some progress. Diversity is becoming integral among our major broadcasters. Diversity is now enshrined in the new BBC Charter. Channel 4 takes its diversity very seriously and both these have amazing apprenticeship schemes which drive diversity too.

I hope the new data from Project Diamond will force others to act. Because there is still much more to do. And there's particularly more to do in broadcasting. Only 1.5% of British TV programmes were made by a BAME Director, and only 14% of TV drama by a woman. Yet 14% of the population are from BAME backgrounds, and half the population are women.

And more than this, Broadcasting is special. You aren't only major and growing employers – important as that is. What we put on our screens represents the nation. It represents us overseas. It represents us to ourselves. It represents who we are, and who we hope to be.

So broadcasting must represent the whole nation. Broadcasting has a special responsibility to ensure every diverse voice from every part and every community of our great nation is represented, literally and figuratively. Broadcasting can and should celebrate the bonds that tie us together.

These bonds are strong, but need nurturing.

For it is a strong foundation of the bonds that tie us together that can then allow us with confidence to celebrate our diversity as a nation how each individual is beautifully unique, and how we are at our finest when we take joy from our differences and are strong, and open, and looking out to the whole world.

That is the vision that we have: of a dynamic, diverse, creative society, finding the best in everyone one of us and looking out confident to the

world.

So let us join together, and make that vision a reality.

[Press release: Lord Gardiner visits the Carnaby Street pollinator paradise](#)

A West End shopping haven transformed into an insect super-highway has been hailed as an example of actions businesses and communities are taking across the country to help pollinators at the start of [Bees' Needs Week](#).

London's Carnaby Street now has more than 700 hanging baskets, window box displays and planters to make the fashion hot spot as attractive to bees as it is to fashionistas.

Part of the Wild West End project, the move by property firm Shaftesbury to bedeck the iconic London landmark with thousands of nectar-rich flowers was championed by Pollinators Minister Lord Gardiner today to mark the start of Bees' Needs Week.

Bees' Needs Week – an annual event to promote the actions people can take to protect pollinating insects which this year takes place 17-23 June – will see a hive of activity across the country including a Pollination Day held by Kew Gardens and a series of bees and butterflies walks hosted by the Wildlife Trusts.

Minister for Pollinators and Biosecurity, Lord Gardiner, said:

Bees and other pollinators are not just a well-loved part of our cities, towns, villages and countryside – they are vital workers, driving our economy and boosting biodiversity.

Each of us can do our bit to help them flourish. Bees' Needs Week is all about celebrating those across the nation who work throughout the year to help our pollinators, and encouraging more people of all ages to join in by taking simple actions such as planting bee-friendly flowers in a window box, letting your garden grow wild or not disturbing insect nests.

Our Bees' Needs champions from Shaftesbury have done an excellent job turning Carnaby Street in to a paradise for pollinators. The project is a fine example of businesses working together and shows how landowners across the country can do their bit to help our bees.

Penny Thomas, Shaftesbury's Company Secretary and lead on its biodiversity projects, said:

Pollinators, such as bees, are vital to the ecosystem and green features in the urban landscape – from sedum pods on roofs to window boxes with pollinator-friendly plants – encourage biodiversity and give residents, visitors and workers a chance to enjoy nature and improve health and well-being.

Bees, butterflies and other insects play a crucial role in our environment and our economy, with 1,500 species of insects pollinating crops in the UK, contributing an estimated £600m to our economy.

But many struggle to find the habitats and food they need. By thinking about Bees' Needs and taking simple actions to meet them, people across the UK can help give bees and pollinators the food and shelter they need to survive.

Supporting the project for a third year, the Wildlife Trusts' Director for England Steve Trotter said:

The Wildlife Trusts believe that everyone should have the opportunity to experience the joy of wildlife in their daily lives and bees are a fantastic way to make a start!

By understanding more about what bees need to survive we can help our precious bees to thrive.

Tim Lovett, Director of Communications at the British Beekeepers Association, said:

People need to do three things to help honeybees and pollinators – Plant! Plant! Plant! They need simple flowers that will provide a good source of nectar and pollen throughout the summer.

Bees' Needs Week runs from 17-23 July in partnership with organisations including Friends of the Earth, the Bumblebee Conservation Trust and Royal Botanic Gardens Kew.

Bees' Needs Week forms a key part of Defra's wider National Pollinator Strategy, launched in 2014 in partnership with charities, businesses and academic institutions. It encourages people to take five simple actions to help pollinators:

- grow more flowers, shrubs and trees
- let your garden grow wild
- cut grass less often
- don't disturb insect nests and hibernation spots
- think carefully about whether to use pesticides

Get involved

- for more information on Bees' Needs Week, events, and how you can get involved, click [here](#)
- follow #BeesNeeds on twitter to find out more about the campaign and tweet your pollinator questions to charities, businesses and bee experts
- build a bee hotel for your garden

[How to build a bee hotel](#)

Pollinators in numbers

- 1,500 species of insects pollinate plants in the UK, including bumble bees, honey bees, solitary bees, hoverflies, wasps, flies, beetles, butterflies and moths
- 25 species of bumble bee, 260 species of solitary bee, 1 honey bee species and hundreds of types of hoverflies, butterflies and moths live in the UK
- 70 of the 100 crop species that provide 90% of food worldwide are pollinated by bees.
- £600m is the estimated value of insect pollination to crops due to increases in yield and quality of seeds and fruit
- 46 hanging baskets, 49 planters, 660 window boxes, 6 green walls and 9 green roofs in Carnaby Street, as part of the Wild West End Project
- 5 simple actions the UK public can take to protect our vital pollinators: grow more flowers, shrubs and trees; leave patches of land to grow wild; cut grass less often; don't disturb insect nests and hibernation spots; and think carefully about using pesticides

[News story: Crown Commercial Service](#)

Annual Report and Accounts Published

The [report](#) shows £12.4 billion of common goods and services are now being procured through CCS, whose aim is to become the 'go to' provider for the procurement of common goods and services across the entire public sector.

During the year, CCS – an executive agency of the Cabinet Office – has delivered £430 million in commercial benefits including savings for central government, and £295 million for the wider public sector – helping to deliver more efficient, effective public services that meet the needs of citizens.

Thousands more small and medium-sized businesses are successfully bidding to become government suppliers, and 32 of the government's largest suppliers have now signed the Prompt Payment Code – pledging to back small businesses by paying invoices on time.

Tony van Kralingen, Chair of CCS, said:

This is a very encouraging performance, led by Malcolm Harrison and his new team. We have exceeded our target for the delivery of commercial benefits to our customers in Central Government and the Wider Public Sector. We continue to build capability and deliver improvements to the quality of service that we offer.

Malcolm Harrison, Chief Executive Officer of CCS, said:

We have made encouraging progress in the past financial year, building on the solid foundations we laid during a thorough operational review which has seen us focus on where we can add greatest value for our customers.

By drawing on our deep commercial expertise and leveraging the purchasing power of our customers across the entire public sector, we have been able to deliver value for money for them, as well as for the nation, in meeting their business needs.

Looking forward, we intend to maintain our sharp focus on meeting our customers' expectations, not least through continuing to improve customer service levels and making it easier for a broad spectrum of public sector bodies to access our deals.

Performance highlights for 2016/17 include:

- £12.4bn of public sector procurement spend channeled through our commercial arrangements including frameworks – £6bn from central government, £6.4bn from the wider public sector. This is an increase of £1.1bn compared to £11.3bn in 2015/16 on a like-for-like basis

- £430m commercial benefits including savings achieved for central government
- £295m commercial benefits including savings achieved for the wider public sector
- All 32 of the Government's Strategic Suppliers have now signed the Prompt Payment Code
- Money spent directly with SMEs across the country via CCS frameworks has increased from £702m (2015/16) to £879m (2016/17)

[News story: Employer survey reveals attitudes to vocational qualifications](#)

Ofqual has today (18 July 2017) [published its first employer qualifications perceptions survey](#) which asked over 2,000 employers for their views on vocational and technical qualifications and assessments. These included functional skills in English and maths and the end-point assessments of apprenticeships. The survey marks a significant step for Ofqual in increasing its understanding of what employers think about the qualifications they use when making decisions about who to hire, which training to invest in, and what business impact they expect to see from staff who achieve those qualifications.

Sally Collier, Chief Regulator, commented:

With major reform of apprenticeship assessment and functional skills in English and maths already underway, and the introduction of the government flagship T level programme on the horizon, there has never been a more important time to hear what employers have to say about qualifications and assessments.

Phil Beach, Executive Director of Vocational and Technical Qualifications, added:

We are committed to supporting the government's ambitious reform programme. This valuable research is a significant step in our plans to engage more closely with employers and understand their needs and views of vocational and technical qualifications.

We now have an in-depth source of new data to draw upon as we aim to understand the reasons why qualifications in particular sectors

do (and do not) work well for employers. The data provides a baseline of employer perceptions, which will be monitored and explored through further engagement with the employers, learners and teaching staff who use these qualifications and assessments.

The survey found that familiarity with qualification reform varies by industrial sector. For example, nearly twice as many respondents from the transport and logistics sector (40%) reported awareness and understanding of functional skills reform than employers from the hospitality sector (23%). These results should help Ofqual target future engagement with sectors that have less familiarity with qualifications to understand whether this is the driver in their lower uptake.

The survey also found that 65% of employers who recruit staff to skilled or supervisory roles consider it essential for applicants to hold a relevant vocational or technical qualification. This was a higher proportion than employers who required applicants to hold A levels (48%) for those type of roles. Conversely, holding a relevant vocational or technical qualification is much less important for employers when recruiting to other roles, with only 46% considering it essential for professional and managerial roles. This information will help Ofqual understand how employers use qualifications according to job types and levels within an organisation.

Elsewhere the study showed that higher proportions of respondents in the public sector say their organisation recruits people with, or arranges training leading to functional skills qualifications, compared to respondents in the private and third/voluntary sector. Ofqual wants to understand why there is a greater reliance on functional skills qualifications in the public sector, and whether other sectors have lower levels of confidence in them.

The '[Employer Qualifications Perceptions Survey](#)' was a pilot project conducted by Pye Tait, who interviewed senior managers with responsibility for recruitment and training decisions from a range of employers. This was a representative sample of industrial sector, employee size and region. Fieldwork took place between February and March 2017 using a quantitative telephone methodology. The intention is to run further studies to build up a longitudinal view of the extent to which employers have confidence in vocational and technical qualifications.

Statement to Parliament: HS2 update: Phase 2a and Phase 2b

I am grateful to you for allowing this statement, Mr Speaker. I am pleased to be here in front of the House tonight. As you know, sometimes these things can happen as a result of cock-up rather than conspiracy.

Today (17 July 2017) marks a major milestone in the government's plans to deliver High Speed 2. High Speed 2 will deliver economic growth across the United Kingdom. It will provide the rail network with the capacity we need for the next century, faster journeys and better connections between cities across the UK.

As [announced to the House this morning](#), we will be awarding stage 1 of the main works civil engineering contracts for the Phase One route from London to Birmingham. This stage primarily covers design and pre-construction activities, although it is worth saying that the initial works have already begun. We expect these contracts to be signed by the end of this month after the completion of the mandatory standstill period. The expected total value of these contracts covering stages 1 and stage 2, which is the full construction phase, is £6.6 billion. They will support around 16,000 jobs across the country and are expected to generate around 7,000 contract opportunities in the supply chain, of which I expect around 60% to go to small and medium-sized enterprises. I have also confirmed the shortlists for the station design contracts and Euston master development partner procurements.

As well as that announcement, today I am introducing the [Phase 2a High Speed Rail \(West Midlands – Crewe\) Bill](#) to the House. This seeks the powers to construct [HS2 from the West Midlands to Crewe](#) so that this important section, which links up to the West Coast Main Line just south of Crewe, can open in 2027.

The design of the route set out in the Bill is largely as announced in 2015. However, there are [3 refinements I have decided to make](#), following [consultation last year](#). I have decided to move the connection to the West Coast Main Line and the start of a tunnel in Crewe further south. I have also decided to move the construction railhead, and subsequently the infrastructure maintenance facility for this part of HS2, from the Basford area near Crewe to a location near Stone. I am very sensitive to the impact that that could have on the local community, which my Hon Friend the Member for Stone (Sir William Cash) has diligently drawn to my attention, but I believe this site is a better location from which to construct and maintain Phase 2a. The new location near Stone is strategically located midway along the Phase 2a route, which means that it can support construction activities heading north and south simultaneously, offering significant programme and construction benefits. Of course, the site at Stone benefits from good transport links, with access to the M6 and the existing rail network right at that location.

In Crewe, moving the railhead from the Basford area avoids planned housing regeneration in that part of Cheshire. It also negates the need for maintenance loops at Pipe Ridware, thereby reducing impacts along the Phase 2a route. It is worth saying that that area of Basford is one of Cheshire's most significant economic development and housing development sites, and I have been very sensitive to that. The construction railhead and infrastructure maintenance facility have been carefully designed so as to minimise impacts locally, particularly on the community of Yarnfield. Having heard local concerns, I have made sure that Yarnfield Lane will remain open.

In preparing the Bill, HS2 Ltd has sought to minimise impacts on the environment and on communities. Following the deposit of the Bill, there will be a [consultation on the scheme's environmental statement](#). That will provide the opportunity to comment on the [environmental effects of the proposed Phase 2a scheme](#) and the [reasonable alternatives](#) considered and reported by HS2 Ltd. The process will result in a report from an independent assessor, which will be provided to all Members of the House before Second Reading.

Turning to Crewe, the HS2 business case has always included 2 trains per hour stopping at Crewe. The Phase 2a Bill includes the interventions needed to support that, but I know that there is a strong ambition to achieve even more. Today, I am therefore launching a [consultation on options to develop a Crewe Hub](#). This work shows how such a service pattern could support an HS2 service to Stoke-on-Trent and bring benefits to places like Chester, north and south Wales, Shrewsbury and Derby. Future decisions will be subject to affordability and value for money. Funding the broader vision for a Crewe Hub will require national and local government to work together, but I believe that there is the potential to deliver even more benefits.

Finally today, I am announcing my [decision on the outstanding sections of the Phase 2b route](#) to Manchester and Leeds, which we [consulted on last year](#). After carefully considering the responses to the consultation, I have decided to confirm the following changes to the route. The western leg rolling stock depot will move from a site near Golborne to a site north of Crewe. That site will be included in the full environmental assessment being undertaken for the whole route and I will look carefully at that assessment.

A 26 km section of the route in the Middlewich and Pickmere area of Cheshire will change and be raised as it passes through the Cheshire salt plains, to avoid brining and gas storage infrastructure. The approach to Manchester Piccadilly station will be adjusted to improve operational efficiency and reduce impacts on residential areas and a primary school. The route near East Midlands airport will now closely follow the eastern side of the A42. This avoids tunnelling under the airport and reduces the impacts on some communities. At Long Eaton, after much consultation with the local community, the route will pass through the town on a high viaduct.

The route in South Yorkshire will be the route we consulted on in 2016, which in part follows the M1 and M18, and serves Sheffield city centre via a spur from the HS2 line. I am also asking HS2 Ltd to take forward the provision of a northern junction back on to HS2, giving a city centre to city centre connection between Leeds and Sheffield in less than 30 minutes. That is very important for the development of Northern Powerhouse Rail. We will also continue to work on a possible parkway station.

Finally, I have decided not to proceed with the proposed change of route to the east of Measham. Instead, I am confirming a modified version of the 2013 preferred route to the west of Measham. In Measham itself, the route is moved approximately 80 metres and the viaduct extended to mitigate commercial property impacts. I have heard the concerns raised by local communities about the proposed eastern leg rolling stock depot at Crofton. HS2 Ltd believes it has found a [better option](#), on which I am now consulting, which is east of

Leeds in the Aire valley, adjacent to the M1 on a brownfield site.

I intend to bring forward a third hybrid Bill for phase 2b in 2019. In preparation for that Bill, HS2 Ltd is today launching a consultation on the technical scope and methodology to be used in the [environmental](#) and [equality](#) impact assessments.

Today's decisions bring certainty for communities who have been unsure of the route for some years. I am updating the [safeguarding directions](#) for the Phase 2b route to protect the land required for the construction and operation of the line. I can also confirm that the same range of property schemes currently operating for phases One and 2a will be available for Phase 2b. This goes over and above what is required by law and gives assistance to those along the line of the route. I have also made amendments to some of the detailed urban/rural boundaries for Phase 2b and to the treatment of properties around tunnel portals.

A [report published today by property specialists Carter Jonas](#) tells us that the particular circumstance of the Shimmer estate development in Mexborough, South Yorkshire means that this package may not allow some homeowners to acquire a similar property in their local area. In the light of the report's findings, I therefore also confirm that the government will ensure that Shimmer homeowners can secure a comparable home, as referred to in my summary document [High Speed Two: from concept to reality](#), which is also being published today. That is really important.

We need HS2. Since privatisation, the number of passenger journeys on our railways has doubled. It has nearly tripled on the key west coast inter-city corridor. We cannot continue to rely on the legacy of our Victorian forebears, far-sighted though they were. By providing new routes for inter-city services, HS2 will free up space on our existing railways. It will reduce overcrowding and allow options for more varied and frequent services, including for places that currently do not have a good connection to London. This released capacity could allow more freight trains. It could also more than double the current number of peak-time seats on busy services from Manchester Piccadilly towards Stoke and Crewe, and from Leeds towards Wakefield. It has the potential to almost double peak seats from London to Peterborough and east coast destinations further north.

Any significant investment needs to offer good value for money, as HS2 does. Today I am publishing the updated [business case for Phase Two](#), which shows that, including the wider economic benefits, the full HS2 network will create £2.30 of benefit for every £1 spent. We want to make the most of our investment in HS2. When Phase One becomes operational, HS2 trains will run to Manchester, Liverpool, Preston, Warrington, Wigan and Glasgow. Phase Two will further reduce journey times between London and Glasgow and Edinburgh to around 3 hours and 40 minutes. To my Scottish colleagues, let me say that we will continue to work with Transport Scotland and Network Rail to look at the best ways of further reducing times, towards an ultimate ambition of a 3 hour journey time between London and Scotland. □We are also looking at opportunities to use HS2 to support Northern Powerhouse Rail and Midlands Connect.

Finally, I know that today's announcement will not be welcome news for those living along the line of the route. There will be concern about how HS2 will affect their homes, communities and businesses. That, sadly, is inevitable if we are going to do big projects of this kind for our nation, but I am determined that we will engage extensively with everyone affected and that we will show fairness, compassion and respect. All the products mentioned today are in the Libraries of both Houses.

Our plan for Britain is a plan to build a stronger, fairer country, with an economy that works for everyone—one in which wealth and opportunity are spread across the country and we are set up to succeed in the long term. Investment in economic infrastructure is a key part of this. HS2 will be the new backbone of the UK rail network. It will transform a rail network built for the 19th century into one designed for the 21st century. It will increase capacity and connectivity across our rail network, bring our country closer together and support economic growth. The benefits of HS2 will be felt across the whole of the United Kingdom. I commend the statement to the House.
