

[Press release: HS2 launches hunt for station designers and Euston development partner](#)

The winning bidders will work with High Speed Two (HS2) Ltd to develop and refine the detailed plans for three brand new stations, at Birmingham Curzon Street, Birmingham Interchange and London's Old Oak Common, as well as a major expansion of London Euston.

The stations will welcome tens of thousands of passengers every day from all over the UK, providing easy and accessible onward connections to local transport, airports and connecting rail services as well as step-free access from street to seat. In total more than 170,000 new jobs are expected to be created in the wider development areas surrounding the four stations.

A separate contest, also launched today, will seek a Master Development Partner to advise on, and later take forward, development opportunities for new homes, offices and retail space above and around the revamped London Euston. The winner will work with HS2 Ltd, Network Rail, the station design contract winner and local authorities to deliver a unified plan to unlock the full potential of the area.

This comprehensive approach has the potential to deliver up to 21 hectares of development space as well as improving accessibility and creating new public and green spaces across the wider Euston site.

Welcoming the launch of the competition, Transport Minister Andrew Jones said:

The search for design teams to produce plans for new stations and world-class amenities for London Euston, Old Oak Common, Birmingham Interchange and Birmingham Curzon Street stations is a major step towards making HS2 a catalyst for growth across the country. The winning bidders will need to ensure the stations provide the best possible customer experience. There are also huge opportunities for development near all the HS2 stations. HS2 Ltd is progressing its search for a partner to deliver new homes, shops and offices around Euston station once the core HS2 work is complete.

HS2 Ltd Commercial Director Beth West said:

We're looking for the brightest and the best from across the industry to help us deliver one of the most tangible legacies of the HS2 project – three brand new stations and a major expansion of London Euston.

All four present unique challenges and opportunities for the winning bidders. Together we will deliver world-class designs that help unlock wider local regeneration opportunities and provide unparalleled levels of accessibility, ease and convenience for the travelling public.

Commenting on the development at Euston, HS2 Ltd Commercial Development Director Tom Venner said:

Euston has been the gateway to the nation and the nation's capital for over a century. HS2 provides the opportunity for it to continue that role into the next century – and for the local community to be proud of that role. Together with our development partner, we aim to redevelop Euston in a way that will make it not just the nation's hub, but London's as well, the heartbeat of both the nation and the capital, fit for the 21st century and beyond.

David Biggs, Managing Director, Network Rail Property said:

Network Rail welcomes the opportunity to create a new London destination at Euston mirroring its neighbour King's Cross and St Pancras where our investment in the station acted as a catalyst, bringing inward investment and regenerating the whole area into a thriving new London quarter.

The HS2 terminal at Euston will have a similar effect, it will become the initial focus for the wider regeneration of the station and surrounding area with an opportunity to create a new vibrant commercial and residential district in the heart of London with fantastic connectivity to the rest of the UK and Europe.

Bidders for the station designs and the Euston Master Development Partner are expected to be shortlisted in the summer, with contracts signed early next year. The station design work will be split into four packages.

[Press release: Minister Ellwood statement on death sentences in Gaza](#)

I strongly condemn the three death sentences carried out in Gaza on 6 April. This decision reflects a worrying trend of increasing use of the death penalty in Gaza.

It is the long-standing position of the UK to oppose the death penalty in all circumstances. We have repeatedly called for the de facto authorities in Gaza to respect the Palestinian Authority's moratorium on implementation of the death penalty.

[News story: Fuel for thought as motorists head off on Easter getaway](#)

Almost 98 per cent of motorways and strategic A roads will be roadworks-free over the bank holiday, meaning motorists and their passengers can enjoy journeys with as little disruption as possible.

We are also reminding drivers to check their vehicles before they set off as it was revealed around 20 motorists break down every day because they have run out of fuel.

Latest statistics show almost half of all breakdowns are caused by simple mechanical problems which could be avoided with simple checks. Nearly a quarter are caused by tyre problems.

Highways England Chief Executive, Jim O'Sullivan said:

I want all drivers to arrive at their destinations safely. We are removing almost all of our roadworks across the country to make people's journeys easier for people this Easter and we are urging drivers to make sure they are ready by checking their fuel, tyres, and lights. Anyone who runs out of fuel is putting themselves and other road users, including their own passengers at risk. With a few simple checks that risk can be overcome and everyone will be safer.

The government is investing £15 billion to improve the strategic road network. The improvements will keep traffic moving even in the busiest periods, cutting congestion – and we are taking action to reduce delays over the bank holiday break. We are completing 190 and suspending 119 miles of roadworks by 6am on 13 April until 12.01am on 18 April to help people get away this Easter with as little disruption as possible.

Schemes completed in time for the Easter getaway include:

- A556 – the £192m Knutsford to Bowdon dual carriageway linking junction 19 of the M6 to junction 7 of the M56 was completed on time and on budget after a 28 month build programme
- A590 – our £1m project to realign and raise the carriageway at Lindal

near Ulverston, removing a the long-running Lindal 'Dip' issue which led to carriageway closures during flooding was completed

- £191 million improvement scheme at Catthorpe Junction 19 of the M1 – which will revolutionise the journeys made by more than 142,000 vehicles through the area every day

And before they set off we are urging drivers to:

- check fuel: make sure you have enough to get to your destination
- check tyres: before setting off on a long/significant journey, check your tyre pressure and the condition of your tyres, including the spare; look out for cuts or wear and make sure the tyres have a minimum tread depth of 1.6mm, which is the legal limit
- check engine oil: use your dipstick to check oil before any long journey, and top up if needed; take your car back to the garage if you're topping up more than usual
- check water: to ensure you have good visibility, always keep your screenwash topped up so you can clear debris or dirt off your windscreen
- check your lights: If your indicators, hazard lights, headlights, fog lights, reverse lights or brake lights are not functioning properly, you are putting yourself at risk; in addition, light malfunctions can be a reason for your vehicle to fail its MOT

You can [view a map showing the locations of lifted and completed schemes](#).

By suspending or completing roadworks, more lanes will be open and many speed restrictions will be lifted. Those wishing to find out more about driving on smart motorways can find further information on our [smart motorways guidance page](#).

Drivers planning to use the Dartford Crossing are reminded to pay Dart Charge in advance or by midnight the day after crossing.

More information can be found [on our website](#) or by calling our information line (0300 123 5000) to keep up to date with conditions on the roads.

For more detailed information on how to carry out your vehicle checks, [view the Think! website](#).

[News story: New Quality and Assurance framework open now](#)

Crown Commercial Service is helping the public sector to test the quality of IT services with a new framework agreement, developed in partnership with the Home Office.

Quality and Assurance Testing is [live now](#), and gives central government and the wider public sector access to pre-evaluated suppliers of IT testing services.

Of the 42 suppliers on the framework, 26 (62%) are small and medium-sized enterprises.

What is the framework for?

If you're designing and/or building a digital requirement or cloud service integration, you may need independent, specialist quality assurance and/or testing before you go live to ensure a smooth implementation.

The new agreement complements other [digital agreements](#) such as:

- Digital Outcomes and Specialists (DOS)
- G-Cloud
- Cyber Security Services
- Crown Hosting

The services available will support testing functionality, usability and performance using independent specialist service expertise.

What is on offer?

Buyers can choose from one of four flexible mini competition options, to select their supplier to deliver a wide range of testing and quality

assurance services.

Services available under the new agreement are:

- Lot 1: Quality Assurance and Testing Specialists
- Lot 2: Automation, Agile and Development Opportunities
- Lot 3: Load and Performance Testing
- Lot 4: Functional Testing
- Lot 5: Infrastructure Testing and Environments
- Lot 6: Operational Acceptance Testing and Disaster Recovery
- Lot 7: Quality Assurance and Testing Management
- Lot 8: Strategic Quality Assurance Consultancy

Buyer Confidence

Only Suppliers who have passed the Home Office's robust evaluation will be able to bid for work under the agreement, giving you an extra level of reassurance.

All Suppliers on this agreement have signed up to government terms and conditions, making tendering simple and effective.

[Press release: Jail term for Scunthorpe waste operator](#)

Yesterday, Nessa Anne Thompson, of Thompson Waste Recycling Ltd was sentenced at Hull Crown Court in relation to two charges relating to waste site operations in Scunthorpe. This followed as a result of the defendant pleading guilty to both offences.

Ms Thompson from Scotter Road, Scunthorpe was sentenced to a total of 6 months in custody. She was also disqualified from being a director for a period of 7 years.

The charges were brought by the Environment Agency contrary to section 33(1)(c) and section 157(1) of the Environmental Protection Act 1990 and one contrary to Regulation 12(1)(a) and Regulation 41(1) of the Environmental Permitting (England & Wales) Regulations 2010.

Ms Thompson operated an illegal waste operation for the company that had previously held a permit until it went into administration before

liquidation. The permit at this point was formally disclaimed.

The site at Winterton Road in Scunthorpe continued to be used and waste was stored in large quantities and in such a manner that it presented a human health and fire risk.

When the site did catch fire on 6 May 2014, firefighters attending the scene were even advised not to re-use the firewater due to the risk of waterborne diseases linked to the number of rats on site.

As a result of inadequate fire breaks at the site efforts to prevent the spread of fire was hampered, causing a greater impact to the adjacent businesses and the wider community.

Speaking after the case, an Environment Agency officer involved with the investigation said:

This site posed a risk to property, the local environment, and people's health because our advice was ignored.

This prosecution demonstrates that we take cases such as this very seriously and will not hesitate to prosecute if necessary, to protect the environment and local communities.

In mitigation, the court heard that the defendant had pleaded guilty to both offences and she was given credit for that. It also heard that her partner was in poor health and that they were both suffering from significant financial hardship.

In passing sentence, the judge said there had been a deliberate flouting of environmental regulations by the defendant. He commented that as the Technically Competent Manager for the site, she would have been well aware that there was no permit in place at the site. He found that there had been attempts to conceal the illegal activity. The judge noted that Ms Thompson has previous convictions for breaches of environmental legislation, for which she was under investigation at the time the current offences were committed. He said that this amounted to a significant aggravating feature.

-ends-

Notes to Editors

Charges

Count 1

PERMITTING THE TREATING, KEEPING OR DISPOSING OF CONTROLLED WASTE IN A MANNER LIKELY TO CAUSE POLLUTION OF THE ENVIRONMENT OR HARM TO HUMAN HEALTH contrary to Section 33(1)(c) and Section 157(1) of the Environmental Protection Act 1990

NESSA ANNE THOMPSON as director of Thompson Waste Recycling Ltd, on or before 6 May 2014 Thompson Waste Recycling Ltd Thompson Yard, Winterton Road, Scunthorpe, North Lincolnshire, DN15 0DH, did treat, keep or dispose of controlled waste in a manner likely to cause pollution to the environment or harm to human health on land at Winterton Road, Scunthorpe, DN15 0DH, namely mixed waste that was being brought onto the site, processed and stored in a manner which posed a fire risk and which did result in two fires on site, and the said offence was committed with your consent, connivance, or attributable to your neglect, as director.

Count 2

PERMITTING THE OPERATION OF A REGULATED FACILITY WITHOUT AN ENVIRONMENTAL PERMIT contrary to Regulation 12(1)(a) and Regulation 38(1)(a) and Regulation 41(1)(a) and (b) of the Environmental Permitting Regulations 2010

NESSA ANNE THOMPSON, as director of Thompson Waste Recycling Ltd, between 18 March 2014 and 13 August 2014 Thompson Waste Recycling Ltd of Thompson Yard, Winterton Road, Scunthorpe, North Lincolnshire, DN15 0DH, operated a regulated facility, which was not authorised by a permit, namely a non-exempt waste operation, on land at Winterton Road, Scunthorpe, DN15 0DH, involving the deposit and processing of waste at the site and the said offence was committed with your consent, connivance, or attributable to your neglect, as director.
