

News story: UK steps up cyber defence

Part of a joint investment by the MOD and the National Cyber Security Programme, the School will address specialist skills and wider education in line with National Cyber Security Strategy objectives.

Armed Forces' Minister Mark Lancaster, who opened the school, said:

Cyber threats to the UK are constantly evolving and we take them very seriously. That's why the Defence Cyber School is so important. It's a state-of-the-art centre of excellence that will train more personnel across Defence and wider government in dealing with emerging threats.

With threats from hostile states changing at pace, the UK faces a deliberate attempt to destabilise secured peace and prosperity.

The 2016 National Cyber Security Strategy provided £1.9 billion of transformative investment in cyber, which is being used alongside more conventional land, maritime and air capabilities, to meet these threats head-on.

Now, building on current capabilities; which include the Global Operations and Security Control Centre at MOD Corsham; and the MOD Computer Emergency Response Team (MOD-CERT); Rapid Response Teams will be established from April.

Teams of specialist Incident Responders will be available to deploy to locations around the UK and overseas, to tackle malicious cyber activity.

Commander Joint Forces Command, General Sir Chris Deverell, said:

Defence has a number of very highly-trained military personnel on hand to deal with emerging and complex cyber threats. We are reinforcing these capabilities with the creation of Rapid Response Teams. Our threat-hunters give us the ability to identify, isolate and respond to these threats, whenever and wherever they might arise.

The UK has advanced counter-cyber capabilities which can protect national interests from harm caused by adversaries. Furthermore, offensive cyber can be used to deal with serious threats to the UK.

[News story: Crown Prince Mohammed bin Salman of Saudi Arabia's visit, March 2018](#)

His Royal Highness Mohammed bin Salman is visiting the UK for the first time since he became Crown Prince in June 2017 and since Saudi Arabia started a major programme of domestic reforms. Saudi Arabia is amongst the largest political, diplomatic and economic power in the Middle East, and the visit will usher in a new era in our bilateral relations with one of our oldest friends in the region.

The Crown Prince's visit builds on the Prime Minister's visit to Saudi Arabia in [November 2017](#). It will help to enhance our co-operation in tackling international challenges such as terrorism, extremism, the conflict and humanitarian crisis in Yemen and other regional issues such as Iraq and Syria.

Saudi Arabia has also set out Vision 2030, a roadmap to open up the country's economy over the next 15 years. This will provide opportunities for British businesses in sectors including education, entertainment and healthcare where they have world-class expertise. It also includes plans for Saudi Arabia to become a global investment powerhouse and the Crown Prince's visit will help explore ways in which Saudi Arabia can build on its investment in the UK in sectors such as infrastructure.

News story: Defence Secretary reaffirms commitment to Daesh's total defeat in meeting with Iraqi counterpart

There will be no respite in UK operations against Daesh until we can guarantee their absolute defeat, the Defence Secretary reassured his Iraqi counterpart, Erfan al-Hiyali, in a meeting in London today.

Defence Secretary Gavin Williamson said:

We will not rest until we hammer the final nail in the terrorists' coffin.

While Daesh's territory is diminishing, the threat they pose to our security at home and abroad through their evil and barbaric beliefs remains stark. That is why RAF jets continue to strike them in Iraq and Syria to eliminate the threat they pose to our way of life.

The importance of continued RAF activity was echoed by Chief of the Air Staff, Air Chief Marshal Sir Stephen Hillier, who said:

With Daesh losing control of its last remaining pockets of territory, they are once more looking purely like the terrorist organisation they are. Yet the threat they pose within the region and more widely across the world remains.

As we have discovered in previous conflicts, if we let up, then we run the risk that Daesh will return. It is vital that we stay the course, alongside our allies, until the job is done.

In the past three weeks, RAF Typhoons, Tornados and Reapers have destroyed armoured vehicles, terrorist bases, weapon stores and disrupted supply routes.

On Wednesday 14 February Typhoons destroyed a mechanical excavator, used by the terrorists to construct fortified positions near the Euphrates river in eastern Syria. Operations continued in eastern Syria on Friday 16 February, Typhoons and Tornado's provided close air support to Syrian Democratic Forces engaged in ground close combat with Daesh fighters, destroying five terrorist positions.

An RAF Reaper patrolled over the Euphrates on Tuesday 20 February, striking armed terrorists, including a pair on a motorcycle moving at high speed. On

Wednesday 28 February, Typhoons attacked two Daesh armoured vehicles north-east of Abu Kamal. A second Typhoon flight destroyed a key road in the area, which will prevent the terrorists from moving heavy truck-bombs and equipment along it.

On Saturday 3 March, Typhoons demolished four Daesh buildings close to the border with Iraq. On Sunday 4 March, a Typhoon destroyed a tunnel used by the terrorists as a weapons cache, located in a remote area in northern Iraq.

RAF aircraft have carried out nearly 1,700 strikes against Daesh in Iraq and Syria since 2014. The UK have deployed Reaper UAVs, Typhoon jets and Tornados, have conducted significant ISR (Intelligence, Surveillance and Reconnaissance) missions and have provided additional air support such as inflight refuelling and transporting.

The UK is working to secure Daesh's lasting defeat by cooperating with legitimate local authorities towards a stable, prosperous and united future for affected communities in both Iraq and Syria and ensuring that Daesh must not be allowed to re-emerge.

[News story: New bursary to get veterans into teaching](#)

Pupils across the country are set to benefit from the leadership and world-renowned expertise of our armed forces – as the government unveils a £40,000 bursary for ex-service personnel to retrain as a teacher.

From September, courses at universities nationwide will offer the incentive to veterans who have left full-time employment in the British Army, Royal Air Force or Royal Navy in the last five years, or anyone leaving before training begins.

The incentive will help ex-servicemen and women – who have spent their career honing the discipline, motivation and unique skills needed to become great teachers – make the transition to the classroom where they can share their expertise with the next generation.

The bursary has been developed as part of the Department for Education's commitment to the Armed Forces Covenant – the nation's promise to those who serve or who have served – and will be offered on priority undergraduate courses in biology, chemistry, computing, maths or modern foreign languages.

Education Secretary Damian Hinds said:

Academic standards are rising, with 1.9 million more children in

good or outstanding schools and a record 15,500 more teachers than in 2010. We want this trend to continue and to explore every opportunity to attract the best and brightest into teaching.

Our ex-servicemen and women – who have already contributed so much to our country – have a wealth of experience and expertise that can be shared in the classroom, teaching pupils the knowledge they need to succeed alongside vital skills, such as leadership and self-discipline.

Defence Secretary Gavin Williamson said:

Our incredible troops have unrivalled life experiences and world-class skills that will motivate and inspire a generation of children in classrooms across the country.

Through leadership, teamwork and problem solving, veterans are ideally suited for a career in teaching once they leave the Armed Forces.

This programme not only offers our valued veterans a new and fulfilling career, it will help our children achieve their aspirations and life goals.

Chief of Defence People, Lieutenant General Richard Nugee said:

This initiative, under the Armed Forces Covenant, is another great addition to our wider resettlement offer of courses, mentoring, and advice, helping our serving personnel successfully transition into civilian life.

The announcement, made today (6 March) by the Department for Education and Ministry of Defence, adds to a number of government bursaries and other financial incentives to encourage even more talented trainees into key subjects.

The new bursary will replace the existing Troops to Teachers Programme, providing veterans with greater flexibility and enabling them to train with any Initial Teacher Training provider, while still receiving the same level of financial support.

The University of Brighton, which has delivered the Troops to Teachers Programme since 2013, has backed the move and will now draw on the experience of training 106 service-leavers to become fully-qualified teachers – with a further 96 trainees currently studying to deploy their skills in the classroom.

Deputy Vice Chancellor at the University of Brighton, Chris Pole said:

The University of Brighton is delighted that non-graduate, ex-service personnel will continue to be offered the opportunity to train to teach.

They offer unique expertise and skills that are especially valued by the pupils they teach as well as the profession more broadly.

Among the University of Brighton's trainees is Colin Grimes, a former Aerospace Systems Manager in the Royal Air Force who is now Year 4 teacher at Rothbury First School in Northumberland. He welcomed today's news:

Studying for a degree in education while being supported financially opened up exciting new career choices for me. Without this kind of support many candidates would not have access to career opportunities of this kind.

So it's great news that ex-military personnel will now be offered even more opportunities to train for a valuable and stimulating second career while still being able to support their families.

In addition to the bursary, trainees will also have access to further support through the government's Get Into Teaching service and other financial incentives. Applications for 2018 courses are now open.

Further Information

The bursary will be paid in the final two years of a three-year course. Bursary requirements – applicants must:

- must be an undergraduate i.e. not already have a degree;
- need to have left full time employment in the British Army, Royal Air Force or Royal Navy in the past 5 years;
- must be interested in studying and qualified to study the priority subjects of secondary maths, biology, chemistry, physics, computing or modern foreign languages;
- meet the appropriate initial teacher training (ITT) eligibility criteria. More [here](#).

From 2019 the Troops to Teachers Programme will cease to exist and the University of Brighton will deliver a new undergraduate ITT programme that will be open to service-leavers.

The Armed Forces Covenant is a promise from the nation to those who serve or

who have served, and their families, which says we will do all we can to ensure they are treated fairly and are not disadvantaged in their day-to-day lives. The Armed Forces Covenant relies on the people, communities, and businesses of the UK to actively support it in order to make a difference.

Today's news adds to a growing number of initiatives to attract the brightest and best into the teaching profession, including:

- Increasing bursaries to £26,000 for all trainees with a 2:2 or higher in the highest priority subjects; physics, languages, chemistry, biology, computing, geography and classics.
- Offering a £20,000 bursary for maths trainees followed by two additional early-career payments of £5k each (£7,500 if teaching in local authority areas where teachers are most needed) in their third and fifth year of teaching, if they have taught in a state school in England since completing their teacher training course. More details here.
- Offering scholarship schemes in six subjects for 2018/19; physics, maths, languages, chemistry, computing, and geography. Successful scholars will receive £28,000 tax-free in all subjects except maths, where scholars will receive £22,000 tax-free.
- Offering bursaries for English trainees have been increased to £15,000 for all trainees with a 2:2 or higher, and bursaries in all other subjects are unchanged for 2018 to 2019.

[News story: Slovakian Air Force Firefighters train in the UK](#)

Held at the Defence Fire Training and Development Centre in Manston, Kent, the week-long course for one of our key NATO partners included learning incident command techniques and aircraft firefighting tactics.

A mixture of British military fire safety personnel and MOD civilian experts provided the training, which is needed because the UK and its NATO partners often land aircraft in Slovakia.

Staff Sergeant Michal Fusi, of the Slovakian Air Force firefighting service, said:

In Slovakia we don't have the these kind of facilities, so when the opportunity came up to come to the UK we took it. This is a big experience for us and a chance to improve our skills, it is very beneficial for us. We will be able to pass on the skills we have picked up here to our colleagues back home.

The training included classroom and live firefighting exercises which featured a variety of retired RAF aircraft donated to the facility including a Nimrod, Tornado, Harrier Jump Jet, Jaguar, Sea King and Lynx helicopters.

Six Slovakian Air Force firefighters have undergone training in the UK to learn vital skills needed to tackle major aircraft fires.

The training area also featured fire simulators such as a "fire wall" and one that is shaped like a large aircraft with seats inside, which can be used to mimic aircraft such as a C-17 Globemaster.

The Defence Fire Risk Management facility at Manston is used for training firefighters across all three services, with more than 3,000 people passing through its doors every year.

Area Manager Ken Cross, the brigade training manager at Manston, said:

We are delighted to have them here. With many British C-17 aircraft landing in Slovakia as part of NATO, the offer of training was extended. Our facilities replicate realistic fire conditions.

The Slovaks loved every minute of what has been a busy and interesting week. They have learnt quickly and are very energetic. They are very, very good firefighters.

It is hoped that this course, the first time that the Slovaks have done this training in the UK, will lead to further opportunities for fire safety personnel from their country to come to Manston.

Six Slovakian Air Force firefighters have undergone training in the UK to learn vital skills needed to tackle major aircraft fires.

The UK and Slovakia have longstanding ties, as evidenced most recently in February, when Air Vice Marshal Edward Stringer represented the UK at the funeral service of Major-General Ivan Otto Schwarz, the last surviving veteran of the Second World War Czechoslovak Squadron.

And in September 2017, the Chief of Defence Staff Sir Stuart Peach visited Slovakia to reaffirm the strong bilateral defence and security relationship that our two countries share.
