## Press release: Captivating CCTV footage of kestrel released by Highways England

The film shows the young bird of prey:

- using the CCTV mast as a perch
- being mobbed both by a magpie and then a raven
- checking out her reflection in the camera
- still-hunting, where the bird sits on the exposed perch and watches for prey
- struggling to keep her perch in high winds

#### <u>Kestrel video</u>

The release of the video comes in the wake of the RSPB's BIG Garden Bird watch last weekend. More than half a million people were expected to take part, recording the number of birds that visited their gardens over a one hour period.

The RSPB is also promoting the Big School Bird Watch during the month of February, where pupils will be encouraged to get closer to nature by counting birds at set times.

More information can be found on the RSPB website.

Traffic Officers Leigh Goodchild and Steve Dyas at Highways England's Regional Control Centre in Avonmouth first spotted the cheeky bird in October 2016.

And since then operators monitoring traffic on CCTV have been treated to frequent sightings as the kestrel has made a camera stand at junction 11a of the M5 one of its favourite perches.

Leigh Goodchild said:

We've grown quite fond of our feathered friend since she started visiting the camera. The platform seems to give a good view of the surrounding area and potential prey — on one occasion she returned with half a mouse which she proceeded to swallow complete, tail and all!

We've also noticed she's rather obsessed with her own image, which she probably thinks is an equally nosey kestrel 'in' the camera, but her inquisitiveness has given us some good close-ups.

She's squawked and attacked the lens a few times as well but when that happens we try to discourage her from hurting herself by

tilting the camera skywards.

Her visits certainly brighten up our day and makes a change from the traffic!

With their pointed wings and long tails, kestrels are a familiar sight along UK motorways and other main roads as they use thermals from the road to hover while they look for prey.

Kestrels are generally recognised by their characteristic hovering hunting mode, but also use perches to hunt. They can often be seen perched on a high tree branch, or on a telephone post or wire, on the lookout for prey. The RSPB estimate that there are around 46,000 breeding pairs of kestrels in the UK, and the bird is on their amber list of protected species.

Highways England Traffic Officers operate motorway CCTV cameras from seven regional control centres and the National Traffic Operations Centre and patrol the motorway network around the clock. They work to keep traffic moving by dealing with incidents and setting signals and signs to alert drivers to potential issues ahead.

### General enquiries

Members of the public should contact the Highways England customer contact centre on 0300 123 5000.

### Media enquiries

Journalists should contact the Highways England press office on 0844 693 1448 and use the menu to speak to the most appropriate press officer.

### Come together: Taskforce visits Cymmer to #TalkValleys

The Ministerial Taskforce for the South Wales Valleys is holding a series of public meetings across the region to seek the views of local communities about priorities for their local areas.

Last month, the Minister for Lifelong Learning Alun Davies, who chairs the taskforce, met with pupils at Ferndale Community School and business leaders in Caerphilly to answer questions about the role of the taskforce and listen to suggestions for priority work areas.

Julie James will join other taskforce members to host a public engagement session at Croeserw Community Enterprise Centre on Thursday (February 2) and

wants to hear from local residents about the challenges and opportunities for people living and working in the valleys.

#### She said:

"The taskforce has made some significant strides forward in recent weeks and it is clear that understanding and awareness of our work is growing.

"The engagement sessions we've held to date have been invaluable in helping to shape our priorities but it's vital we continue to work with and listen to communities throughout the lifetime of the taskforce.

"From the discussions we've had with the public so far, some key themes have emerged. These include the importance of linking businesses with local schools to give young people the confidence and skills they need to enter into the world of work and the importance of linking infrastructure like industrial sites, schools, colleges and transport initiatives together, ensuring true connectivity for the valleys.

"I am sure more will continue to emerge in the coming weeks starting this week in Cymmer. I would urge anyone who feels passionately about where they live to come along and have their say. We're here to listen and your views will help shape our shared vision for the valleys."

The taskforce was set up by the Welsh Government in July and aims to build on work previously undertaken across the South Wales Valleys in a more coordinated and targeted way to meet the needs of valley communities.

This week's session will follow a full meeting of the valleys taskforce which will take place in Llanhilleth Miners' Institute and will focus on public services.

To learn more about the work of the taskforce or to sign up to attend one of the public meetings, please visit the <a href="Facebook">Facebook</a> page.

### News story: Manchester seminar: Developing place based services in Gtr

#### Jane Forrest

Greater Manchester Public Service Reform Team

The scale of financial challenge facing Greater Manchester public services continues to be a driver for change and across Greater Manchester (GM) partners are working together on the radical reform of public services through a series of challenging and ambitious programmes to improve outcomes for GM residents whilst increasing independence and reducing the rising demand on public services.

The development of place-based integrated working is an essential feature of the GM whole-system approach to the creation of new Public Service delivery models. These new delivery models are being designed against demand; focussing on reduction and prevention and building on community capacity. It is intended that these new models will maximise operational effectiveness within the context of reduced budgets and are essential to the sustainability of neighbourhood services.

In this free seminar learning Jane will share past and future challenges for GM place-based delivery models and discuss how citizens are at the centre of their plans and will help to truly drive whole system reform

### News story: Serious signalling irregularity at Cardiff East Junction

Over the Christmas period in 2016, Network Rail carried out extensive resignalling and track remodelling work in and around Cardiff Central station. This was the final stage of the Cardiff area signalling replacement scheme, a project which has been in progress for several years. This stage involved the closure of the power signal box at Cardiff, with control of the area moving to the South Wales Control Centre (SWCC), and changes to the track layout and signalling on the east side of Cardiff Central station.

Some of the new track layout was brought into use on 29 December. At 08:46 hrs on that morning the driver of train 2T08 from Cardiff Central to Treherbert, which had just left platform 7, noticed that a set of points in the route his train was about to take were not set in the correct position. Train 2T08 was the first up train on the Up Llandaff line after the start of service over the new layout.

The points at which the train stopped were redundant in the new layout and should have been secured in the normal position in readiness for their complete removal at a later date. The project works required eight point ends in two separate locations to be locked and secured in this way. In the event only six of the eight point ends were locked and secured, and the line was re-opened to traffic without the omission having been identified by the project team through the normal checking processes which should take place as part of this type of works. These two point ends were left in a condition in which they were unsecured and not detected by the signalling system, and the points at which train 2T08 stopped, points 817A, were left lying reverse. If the driver had not noticed the position of these points and stopped, the train would have been diverted towards line E (the former down relief line) on which trains can run in either direction. The new signalling system uses axle counters for train detection, and in this situation the system would not have identified that the train was in the wrong place.

A few minutes earlier, at 08:24 hrs, another train, down train 1V02, had travelled over the other points which had been left unsecured at the other end of the same crossover (817B). These points had been left in the normal position, which was correct for trains travelling over them in the down direction.

No-one was injured and no damage was caused by either event, and Network Rail acted quickly to secure both sets of points.

Our investigation will examine:

- the events leading up to the commissioning of the new track layout in the area of 817 points
- the methods that Network Rail's Cardiff area signalling replacement project used for project management and assurance processes

• the on-site team briefing and works management process.

It will also examine any relevant management issues and consider previous relevant recommendations made by the RAIB.

Our investigation is independent of any investigation by the railway industry or by the industry's regulator, the <a href="Office of Rail and Road">Office of Rail and Road</a>.

We will publish our findings, including any recommendations to improve safety, at the conclusion of our investigation. This report will be available on our website.

# It's welcome news that simplifying fares will be trialled but it is clear that this is just tinkering around the edges — Andy McDonald

### Andy

McDonald MP, Labour's Shadow Transport Secretary, commenting on reports that reforms to the rail fare system will be trialled this May, said:

"It's

welcome news that simplifying fares will be trialled but it is clear that this

is just tinkering around the edges.

"Privatised rail has created a fragmented system with a jumble of operators offering a complicated array of fares for passengers to navigate.

"Passengers don't want to shop around for tickets, they want to get from A to  $_{\mbox{\scriptsize R}}$ 

for the cheapest price. This is why Labour will bring our railways back into public ownership, creating an integrated national network with simple and affordable fares for all."
