

Press Releases: Department of State Antiterrorism Assistance Program Graduates First All-Female Iraqi Police Class

Media Note
Office of the Spokesperson

Washington, DC
July 27, 2018

On July 26, the Department of State's Antiterrorism Assistance (ATA) program graduated its first class of all-female Iraqi law enforcement officers at a training facility in Jordan.

U.S. representatives from U.S. Embassy Amman and Embassy Baghdad joined Jordanian and Iraqi officials at the graduation of 20 Iraqi police women at the Jordanian Public Security Department's Princess Basma Institute for Training Police Women.

The police officers, all from the Iraqi Ministry of the Interior police units, were trained in terrorist crime scene investigation techniques taught by ATA trainers with the Diplomatic Security Service.

The officers will return to their units in Iraq, where they will apply their new skills to investigate terrorist attacks and related incidents. They will join the nearly 11,000 other women police officers who make up the 500,000-strong Iraqi police forces.

About the Antiterrorism Assistance (ATA) Program

Established in 1983, the Department of State's Antiterrorism Assistance (ATA) program is the U.S. Government's premier counterterrorism training and equipment provider for foreign law enforcement agencies. All ATA assistance is delivered within a rule-of-law framework that promotes respect for human rights and fosters development of a self-sustaining capability through best practices such as embedded mentors and train-the-trainer programs.

ATA receives funding and policy guidance from the Bureau of Counterterrorism and is administered by the Bureau of Diplomatic Security and its Diplomatic

Security Service.

Through ATA, DSS personnel build the critical counterterrorism capabilities of law enforcement partners abroad with both knowledge-enhancing training courses and tactical skills development to detect, deter, and disrupt terrorist activities. With its cutting-edge curriculum and equipment grants, the ATA program continues to contribute greatly to the security of our nation, our partners worldwide, and overall international peace and stability.

[Press Releases: US-Japan-ROK Experts Meeting on Cybersecurity](#)

Media Note
Office of the Spokesperson

Washington, DC
July 27, 2018

On July 27, 2018, the United States hosted a trilateral cyber experts meeting with Japan and the Republic of Korea on cybersecurity in Washington, DC. The three countries reaffirmed their commitment to promoting an open, interoperable, reliable, and secure Internet. They also committed to advancing trilateral cooperation to enhance international cyber stability, deter malicious activities in cyberspace, and counter cyber threats, including from state actors. Participants also discussed cybersecurity of the 2018 and 2020 Olympics, capacity building efforts, and regional cyber policy coordination. The meeting builds on President Trump's, Prime Minister Abe's, and President Moon's commitment to enhance cyber cooperation.

The U.S. delegation included representatives from the Departments of State,

Homeland Security, Justice, and Commerce.

Press Releases: Pakistan Election

Press Statement
Heather Nauert

Department Spokesperson

Washington, DC
July 27, 2018

The United States takes note of yesterday's election results in Pakistan. The United States commends the courage of the Pakistani people, including many women, who turned out to vote and showed resolve to determine their country's future.

We condemn the horrific acts of terrorist violence that marred this process, including the latest attack outside a polling station in Quetta on election day. We offer our deepest condolences to the victims and their families, and wish a speedy recovery to those injured.

The development of strong democratic and civilian institutions of governance and a vibrant civil society is critical to Pakistan's long-term stability and prosperity. In that context, the United States shares concerns about flaws in the pre-voting electoral process, as expressed by the Human Rights Commission of Pakistan. These included constraints placed on freedoms of expression and association during the campaign period that were at odds with Pakistani authorities' stated goal of a fully fair and transparent election. The United

States concurs with the conclusions of the European Union Election Observation Mission, whose report notes that while there were positive changes to the legal framework for elections in Pakistan, these were overshadowed by restrictions on freedom of expression and unequal campaign opportunities. The United States also has deep reservations over the participation of terrorist-affiliated individuals in the elections, but we commend Pakistani voters for fully rejecting these candidates at the ballot box on Wednesday.

Along with our international partners, the United States will continue to encourage a broadening of opportunities for political participation for all Pakistanis, and for the further strengthening of legitimate, democratic institutions. As Pakistan's elected leaders form a new government, the United States will look for opportunities to work with them to advance our goals of security, stability, and prosperity in South Asia.

Press Releases: U.S. Department of State Awards U.S. ASPIRE Prize to Personalized Medicine Scientist

Media Note
Office of the Spokesperson

Washington, DC
July 27, 2018

The U.S. Asia-Pacific Economic Cooperation (APEC) Science Prize for Innovation, Research, and Education (ASPIRE) Competition named Dr. Kara Spiller of Drexel University as the 2018 U.S. nominee to represent the United States for the APEC-wide ASPIRE Prize.

ASPIRE is an annual award hosted by the APEC Policy Partnership for Science, Technology, and Innovation (PPSTI) that recognizes young scientists from APEC economies who have demonstrated a commitment to both excellence in scientific research, as evidenced by scholarly publication, and cooperation with scientists from other APEC member economies. ASPIRE, as well as the competition for the U.S. ASPIRE nominee, is co-sponsored by Wiley and Elsevier, publishers of scholarly scientific knowledge and coordinated by the U.S. Department of State. The winner of the APEC-wide competition will receive a cash prize of \$25,000 and will be announced at the August meeting of PPSTI in Papua New Guinea.

An emerging leader in immune engineering and personalized medicine, Dr. Spiller was selected because of her innovative research on the design of “smart” biomaterials that can control the behavior of innate immune cells to promote tissue repair and wound healing. She developed a point-of-care diagnostic to tailor optimal treatment for patients based on the state of their immune system, depending on factors such as age, genetics, and nutrition. Her work has been published in journals including Biomaterials, Journal of Investigative Dermatology, Blood, Immunobiology, and the Journal of Neuroscience.

While only one nominee can be put forward from the United States to compete for the broader ASPIRE prize, the U.S. nominee and three runner-ups will be celebrated at a public lecture roundtable with government officials, and a U.S. award ceremony in Washington, DC, later this year. Runners-up for the 2018 U.S. ASPIRE prize include:

Dr. Jordan Green, Associate Professor at Johns Hopkins University, a world leader in gene therapy and the use of biodegradable particles to teach the immune system to recognize cancer cells.

Dr. Manu Prakash, Assistant Professor of Bioengineering at Stanford University, is a designer of novel techniques to deliver health solutions in the world’s most resource poor conditions.

Dr. Jorge M. Zuniga, Assistant Professor of Biomechanics at the University of Nebraska at Omaha, is the creator of the first open source 3D printed hand prosthesis for children in the United States named Cyborg Beast.

[Press Releases: Deputy Secretary Sullivan's Meeting With Kazakhstan Foreign Minister Kairat Abdrakhmanov](#)

Readout
Office of the Spokesperson

Washington, DC
July 26, 2018

The below is attributable to Spokesperson Heather Nauert:

On July 25, Deputy Secretary of State John J. Sullivan met with Kazakhstan Foreign Minister Kairat Abdrakhmanov on the margins of the Ministerial to Advance Religious Freedom in Washington, D.C. Deputy Secretary Sullivan and Foreign Minister Abdrakhmanov discussed protecting religious freedom, mutual efforts to strengthen regional cooperation in Central Asia and expand bilateral trade and investment, and building on the progress made since the January 2018 White House visit of President Nazarbayev as part of the new enhanced strategic partnership.
