<u>Press Releases: Expert Report From the Moscow Mechanism for Human Rights</u>

## **Abuses in Chechnya**

Press Statement Robert Palladino

Deputy Spokesperson

Washington, DC December 20, 2018

Today the United States welcomes the expert, fact-finding report on human rights violations and abuses in the Russian Federation's Republic of Chechnya and impunity for them, which we believe to be a particularly serious threat to Russia's fulfillment of its Organization for Security and Cooperation in Europe (OSCE) human dimension commitments.

This expert report concluded that Chechen authorities committed torture and other appalling human rights violations and abuses, including extrajudicial killings of LGBTI persons and others, and describes a worsening "climate of intimidation" against journalists and civil society activists. The report observes that the Russian government "appears to support the perpetrators rather than the victims" and has "not lived up to its responsibilities" to address the "grave situation" in Chechnya.

The report, presented today at the OSCE, is the result of the invocation by the United States and 15 other countries of a rarely used diplomatic tool known as the Moscow Mechanism.

We call on the Russian Federation to protect the human rights of all within its borders, consistent with international law, OSCE commitments, and its own constitution. We support the report's recommendations that Russia conduct a new and truly independent inquiry into the violations and abuses, that human rights defenders and the media be allowed to operate in Chechnya without reprisal, and that imprisoned human rights defender Oyub Titiyev be immediately released.

The United States will continue to speak out in support of human rights for individuals everywhere, including in Chechnya, and to support international efforts to promote accountability for those responsible for human rights violations and abuses.

Press Releases: Joint Statement by
Secretary of State Michael R. Pompeo
and Secretary of Homeland Security
Kirstjen Nielsen: Chinese Actors
Compromise Global Managed Service
Providers

Media Note Office of the Spokesperson

Washington, DC December 20, 2018

Since at least 2014, Chinese cyber actors associated with the Chinese Ministry of State Security have hacked multiple U.S. and global managed service and cloud providers. These Chinese actors used this access to compromise the networks of the providers' clients, including global companies located in at least 12 countries.

The United States is concerned that this activity violates the 2015 U.S.-China cyber commitments made by President Xi Jinping to refrain from conducting or knowingly supporting "cyber-enabled theft of intellectual property, including trade secrets or other confidential business information, with the intent of providing competitive advantages to companies or commercial sectors." China has also made this commitment with G20 and APEC members as well as in other bilateral statements.

Stability in cyberspace cannot be achieved if countries engage in irresponsible behavior that undermines the national security and economic prosperity of other countries. These actions by Chinese actors to target intellectual property and sensitive business information present a very real

threat to the economic competitiveness of companies in the United States and around the globe. We will continue to hold malicious actors accountable for their behavior, and today the United States is taking several actions to demonstrate our resolve. We strongly urge China to abide by its commitment to act responsibly in cyberspace and reiterate that the United States will take appropriate measures to defend our interests.

The LECG remains a crucial vehicle to improve international cooperation on combating Hizballah's terrorist and criminal schemes.

Officials from the U.S. Departments of State, Justice, and Treasury, as well

as the Federal Bureau of Investigation, National Counterterrorism Center, and Drug Enforcement Agency also participated in this meeting. The LECG will convene again in Europe in 2019.
