[Update on cluster of Rhinovirus cases in Kowloon Hospital](#)

The following is issued on behalf of the Hospital Authority:

Regarding the announcement yesterday (May 30) on a cluster of inpatients infected with Rhinovirus in a male infirmary ward of the Rehabilitation Department, the spokesperson for Kowloon Hospital (KH) gave the following update today (May 31):

One more 76-year-old patient of the ward presented with respiratory symptoms. An appropriate viral test was arranged for the patient and his test result was positive for Rhinovirus. He is being treated under isolation with stable condition.

KH will continue the enhanced infection control measures and closely monitor the situation of the ward. The case has been reported to the Hospital Authority Head Office and the Centre for Health Protection for necessary follow-up.
