

Update on latest MERS situation in Saudi Arabia

The Centre for Health Protection (CHP) of the Department of Health is today (June 19) closely monitoring 75 additional cases of Middle East Respiratory Syndrome (MERS), including 23 deaths, reported to the World Health Organization (WHO) by the Kingdom of Saudi Arabia (KSA) between January 12 and May 31, 2018, and again urged the public to pay special attention to safety during travel, taking due consideration of the health risks in the places they visit.

According to the WHO, among the 59 male and 16 female patients aged 15 to 93, 57 of them had underlying illnesses, 24 had exposure to camels, and three were health care workers. Among these 75 cases, 21 cases were in two hospital clusters and two household clusters.

According to the latest information, 2 220 cases have been reported to the WHO (with 790 deaths), including 2 003 in 10 Middle East countries comprising 1 844 in the KSA, 87 in the United Arab Emirates, 28 in Jordan, 19 in Qatar, 11 in Oman, six in Iran, four in Kuwait, two in Lebanon, and one each in Yemen and Bahrain.

"We will maintain close communication with the WHO and relevant health authorities," a spokesman for the CHP said.

"Travellers to the Middle East should avoid going to farms, barns or markets with camels; avoid contact with sick persons and animals, especially camels, birds or poultry; and avoid unnecessary visits to healthcare facilities. We strongly advise travel agents organising tours to the Middle East to abstain from arranging camel rides and activities involving direct contact with camels, which are known risk factors for acquiring MERS Coronavirus," the spokesman said.

Travellers to affected areas should maintain vigilance, adopt appropriate health precautions and take heed of personal, food and environmental hygiene. The public may visit the MERS page of the [CHP](#) and its [Travel Health Service](#), MERS statistics in [affected areas](#), the CHP's [Facebook Page](#) and [YouTube Channel](#), and the WHO's [latest news](#) for more information and health advice. Tour leaders and tour guides operating overseas tours are advised to refer to the CHP's [health advice on MERS](#).
