

Update on supplies from Mainland

The Task Force of Supplies from the Mainland led by the Transport and Housing Bureau (THB) has been working closely with the Guangdong Provincial Government and the Shenzhen Municipal People's Government to explore various means to stabilise the supply of goods from the Mainland to Hong Kong. In addition to road transport arrangements, transportation of goods by water and railway is already in service.

A spokesperson for the THB said that the "Sea Express" water transportation service from the Mainland to Hong Kong has been fully launched and its capacity is rising to increase the supplies of fresh food, other daily necessities and manufacturing materials. The current supply of fresh food from the Mainland is stable.

Currently, there are three water transportation routes between Hong Kong and Shenzhen, namely (1) from Shenzhen Yantian International Container Terminals to Hong Kong Kwai Tsing Container Terminals (KTCT); (2) from Shenzhen DaChan Bay Terminals to KTCT; and (3) from China Merchants Port (South China) Management Center (Shenzhen Mawan, Shekou and Chiwan Container Terminals) to Hong Kong River Trade Terminal and elsewhere. Together with the water transportation routes from other cities in Guangdong Province, including the routes from Guangzhou Lianhuashan Port, Nansha Port, Huadu Port, Zhongshan Huangpu Port and Zhuhai Doumen Port to different terminals in Hong Kong, the water transport capacity amounts to tens of thousands of tonnes daily.

The spokesperson said today (April 24) that Shenzhen operated 51 cargo vessel trips and transported around 5 060 twenty-foot equivalent units (TEUs) of cross-boundary supplies by water yesterday (April 23), equivalent to about 22 040 tonnes of goods, of which around 10 TEUs (about 40 tonnes) were fresh food and around 5 050 TEUs (about 22 000 tonnes) were non-fresh food, according to information from the Mainland authorities.

Since the launch of services from the three ports in Shenzhen since February 18 to yesterday, a total of around 238 150 TEUs of cross-boundary supplies have been transported, equivalent to about 1 301 130 tonnes of goods, of which around 1 470 TEUs (about 12 730 tonnes) were fresh food and around 236 680 TEUs (about 1 288 400 tonnes) were non-fresh food.

To further ensure a stable goods supply to Hong Kong through land transport, a trial run of cargo transfer was conducted by the THB at a yard situated on Kam Pok Road, San Tin, Yuen Long, and it was completed smoothly. The THB will continue to work with the Mainland authorities to fully take forward cargo transfer arrangements on the Hong Kong side. It is a contingency measure in response to the latest epidemic situation in the city so as to reduce the risk of epidemic transmission in both the Mainland and Hong Kong, ensuring both smooth cross-boundary land transport and a stable goods supply to Hong Kong.

Meanwhile, to avoid a spillover of the epidemic, the Transport Department (TD) has arranged for dedicated staff to conduct rapid antigen tests (RATs) for cross-boundary goods vehicle drivers at various land boundary control points (BCPs) from February 28 onwards. Only drivers with a negative result are allowed to enter the Mainland. In order to further improve the accuracy of the tests, the TD has already replaced the RATs with rapid nucleic acid tests at the BCPs. Starting from April 21, the sampling method for rapid nucleic acid tests has also been changed from combined nasal and throat swabs to nasopharyngeal swabs. A total of 2 123 rapid nucleic acid tests were conducted yesterday in which 21 drivers preliminarily tested positive. The TD has passed the cases to the Department of Health for follow-up.

The THB will closely monitor the situation and co-operate with the Mainland authorities to facilitate and implement various measures to ensure a stable goods supply to Hong Kong, with a view to complementing the supply through road, water and railway transport, enhancing capacity and efficiency as well as optimising the flow of cross-boundary supplies.
