

Using tech to propel mail service

Hongkong Post has responded to the rapid growth of e-commerce by developing a range of smart technology solutions including the iPostal Kiosk service and introducing a sorting robotics system to streamline the mail handling process.

News.gov.hk spoke to the management of Hongkong Post to learn more about how it is tapping the potential of technology to meet constantly changing market needs and enhance operational processes.

The story is available at www.news.gov.hk/eng/feature today (July 16) in text and video format.
