

Visit to Biointeractions in Shinfield

I visited Biointeractions at their request. It is a successful company making products to control infection for surgical implants and in other medical uses. They showed me their laboratories, with research, production of their coatings and testing all in the same building at Collegiate Square.

They have grown the business over the years and now have 20 staff. They are developing new products which they think will help infection control in hospitals. It is good news that local talent is working away on one of the crucial issues for the NHS as well as overseas medical services. There is always room to improve infection control to reduce the numbers of people who develop a condition after surgery and treatment.
