

Waste and recycling company fined after employee injured during machinery maintenance

A waste and recycling company has been fined after an employee suffered a broken arm and crush injuries whilst carrying out maintenance work at a site in, Llandow, Vale of Glamorgan.

Cardiff Magistrates' Court heard how on 28 February 2018, an employee was tracking a running conveyor when his arm became entangled between the conveyor belt and the roller, causing a broken arm and crush injuries.

An investigation by the Health and Safety Executive (HSE) found the company had failed to undertake a suitable and sufficient assessment of the risks posed by maintenance work on the conveyor and failed to draw up a safe system of work for the procedure, including adequate isolation. The company also failed to report the incident under RIDDOR within 10 working days.

Siteserv Recycling (Waste Paper) Ltd of Llandow Trading Estate, Llandow, Cowbridge pleaded guilty to breaching Section 2(1) of the Health and Safety at Work Act and Regulation 4(1) of the Reporting of Injuries, Disease and Dangerous Occurrences, Regulations 2013. The company was fined £25,333 and ordered to pay £8,882.15 in costs.

Speaking after the hearing, HSE inspector Matthew Hamar commented:

“This injury was easily preventable. Employers should make sure they properly assess risk and apply effective control measures to minimise the risk from dangerous parts of machinery, especially during maintenance work.”

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk
