

Welters Orbs & Boulders

Made in Britain and manufactured using locally sourced, environmentally sympathetic materials. They can transform any landscape, be it woodland walkways, private gardens or curtilages, along the banks of a stream or as use as sea and flood defences. The suitable locations and uses are endless. The orbs have a cavity which can be used to inter cremated remains or to house keepsakes. Or simply used as a memorial or marker. They are faced with a tablet manufactured from a selection of materials and can be inscribed for prosperity. Adding to the range is the imminent release of the Burr Orb System – transforming manufacturing reuse with resolve to global environmental solutions.
