

Why won't Wokingham Council mend the potholes? More money for Wokingham and West Berks.

The state of Wokingham's roads is atrocious. I am getting plenty of complaints about the increased number of potholes and the poor surfaces which have deteriorated badly in the last two years. The Lib Dems seem to want the roads to get worse to deter people from driving to work or school.

I have successfully pressed with some other Conservative MPs to make tackling potholes a priority. Wokingham is getting a current baseline sum of 3,314,000 from government each year for road maintenance. The government is also providing an additional 418,000 extra this year and again next year for additional work on potholes. The minimum promised uplift in road money between 2023-4 and 2033-34 will be 13,095,000.

So Wokingham Council, what is your excuse now? This is another increased sum and new money the Lib Dems do not want to tell us about. Time to do something with all this extra money.

West Berkshire with more road to maintain gets 5,387,000 as base sum, with a pothole uplift of 679,000 this year and next.
