

Woodworking company fined after worker suffered multiple leg injuries

Arnold Laver & Company Ltd have been sentenced for safety breaches after a worker was struck by objects falling from an articulated trailer.

Bradford Magistrates' Court heard that on 24 July 2019, the 45-year-old worker had been unloading the bottom deck of the double deck articulated trailer, which was being used for overflow storage at the company's Manningham Sawmill site in Canal Road, Bradford.

An investigation by the Health and Safety Executive (HSE) found that the trailer was being used to store mainly composite decking on the lower deck. The upper deck contained packs of MDF architrave, timber stock, and various promotional materials.

Another operative needed to place a pallet of decking on the bottom deck, and to make more space to do that he removed a side support, which helped to hold the top deck of the trailer up. However, another side support had already been disengaged and when the second support was removed the loaded top deck of the trailer partially collapsed. Part of a pack of architrave slid off the top deck and hit the worker. He suffered a broken left femur and other bones in his left foot.

Arnold Laver & Company Ltd of Bramall Lane Sheffield South Yorkshire pleaded guilty to breaching Section 2 (1) of the Health & Safety at Work etc Act 1974. The company has been fined £150,000 and ordered to pay £1,719 in costs.

Speaking after the hearing, HSE inspector David Beaton said: "The use of the trailer as a storage facility had not been properly risk assessed.

"This incident could so easily have been avoided by simply using correct control measures and safe working practices."

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk
