**The Originators and  
Leaders in the industry**

**INNOVATION BY DESIGN**  
**Creative and original**

Over the past three decades, **welters®** have introduced new and innovative above and below ground interment and memorial facilities to the industry.

Today, many of these systems are accepted as standard nationwide and the company continues to produce new and original concepts, leading the way into the next decade.

Supplying products & systems for all full body interment needs, below & above ground, cremated remains & memorialisation.

# A Work in Progress - Multi-material Mausolea Installation

Spring is here and our team enjoy the bright weather as they unload parts and commence the extension of this mausolea cemetery section. The daffodils wave cheerily as they work.

Update to follow...

### **Galloway Heritage Herd**

The establishment of the **welters**<sup>®</sup> 'Heritage' Pedigree Herd of Galloway cattle is and will continue to be one of the enduring and most rewarding aspects of the Land Based enterprises. The Genetic design of the Native Scottish outlying breed with countless benefits was in danger of diminishment.

The 'Heritage' Herd has Gene design from the finest Global Pedigrees to protect and perpetuate the finest Scottish Native breed which thrives on the hill land, heathland herbs and water meadows of our diverse landscapes.

## Galloway Heritage Herd

welters® continues to own and develop the Heritage Galloway Herd of single suckle cattle. This magnificent family has a historic pedigree feeds from natural grasses, heathers mosses and water meadow plants. The Galloway is one of the oldest and purest of our native cattle breeds. They are famed for their hardiness and can live off the poorest of land. The Galloway female is the ideal suckler cow and will produce an excellent beefy calf which is in great demand by people requiring the highest quality, natural grown beef. Galloway Cattle have a great deal to offer and will fit into any agricultural system, either a traditional hill farm or low land management plan. Galloway popularity is growing due to the increased interest in British Native breeds and environmental issues.

At the 2009 Royal Highland show, the Galloway breed won all the major trophies including the individual, native interbreed, interbreed and pairs competitions. Never before has one breed dominated all the cattle championships at Scotlands premiere event.

### **White Galloway Heritage Herd**

The White Galloway Heritage herd is a recent addition to **welters**<sup>®</sup> agricultural programmes. As part of their commitment to protecting native species and resources in the UK the White Galloway has a heritage that stretches back to the white wild cattle of ancient Britain.

## White Galloway Heritage Herd

The colour pattern of the White Galloway is mostly white, with its colour restricted to its ears, feet, and around its eyes. They will also often have colour on their poll, tail, and udder. The White Galloway breed originates from the Wild White cattle of ancient Britain.

The Galloway is naturally hornless, and instead of horns has a bone knob at the top of its skull that is called a poll. This breed's shaggy coat has both a thick, wooly undercoat for warmth and stiffer guard hairs that help shed water, making them well adapted to harsher climates.

**welters**<sup>®</sup> Galloway herds of Whithaugh forms part of their mission and drive for research and development in the protection of native species and natural resources

The **welters**<sup>®</sup> White Galloway Heritage Herd and the Green Agriculture and Land Management programmes are elements within the Biodiversity and Specie Protection and Enhancement Programmes.
